I had an unexpected day once. When I woke one morning to find a giant buttplug up my and a huge blackglued to my forehead. Also there was what could only be described as a dwarf hooker next to me about to snort a line off my In the corner of the room was an obese naked man with huge feathers sticking out of his with a very small But worse of all was my PE teacher from high school about to drop his onto the black on my forehead. This was a very unexpected day and far better than the day in this game.. i hate this game. Unexpected Day is a game that I can't recommend because: - it's not worth the money - there are lots of bugs - the controls are horrible - it is boring - the graphics are terrible - the menu soundtrack plays only once - it crashes all the time - devs think that esc button is only used to summon taskmanager that is used to kill the application - you can't rebind the keys - it has big grammar problems - this game is for the trading cards only - instructions are non existant. - it is a mystery why this game is even on steam - don't buy. if gotten for free don't even download.. Game does not launch.. I did not use this game to farm trading cards.. I know it was cheap and saw it had bad review but like hm maybe this game is good but I was really dissapointed. They have bad text. not really good explanation on things. Even the mechanics so I do not recommend this game. I feel sad that the developer added cards early instead of focusing on the game.. crashes every 10 seconds
